ISO 25010:2011 SOFTWARE QUALITY
EVALUATION TOOL
PROJECT TITLE HERE

Part I: Evaluators Basic Information

Name (optional):	Years of Experience? _____ Date: _____ / _____ / _____
Sex: ____Male ____Female	Do you have smartphone? ____Yes ____No
Respondent Type: ____ Industry ____IT Expert	Do you have access to internet? ____Yes ____No

Part II: Assessment of the Extent of Compliance to ISO 25010:2011 Software Quality

5 – very high extent 4 – high extent 3 – moderate extent 2 – low extent 1 – very low extent

A.	**Functionality Suitability**	5	4	3	2	1	Comments
	1. The information is effective and helpful to complete what is needed.						
	2. The system/website has all the functions and capabilities needed.						
	3. The system/website provides error messages /notifications that are clearly understandable.						
B.	**Performance Stability**	5	4	3	2	1	Comments
	1. The same function (e.g. adding, viewing, editing, uploading, printing, posting and many more) be used by more than one person at the same time with efficiency.						
	2. The software/website support group's devices with application upgrades or browser updates.						
	3. The software/website or project forms, tables, data grids or webpage contents are being displayed and viewed real-time without carrying runtime errors.						
C.	**Compatibility**	5	4	3	2	1	Comments
	1. The software/website is compatible with input/output standards, Programming language and Database standards.						
	2. The system/website is compatible and responsive to any device in any type of resolution.						
3.	The system/website is accessible and compatible on Windows, Mac and open source platforms.						
D.	**Usability**	5	4	3	2	1	Comments
	1. The system/website can operate 24/7 even outside human interaction.						
	2. The system/website menus, links, and buttons are working properly on specified use.						
	3. The system/website allows me to efficiently complete any process or transaction with faster turn-around.						
E.	**Reliability**	5	4	3	2	1	Comments
	1. Information provided/posted on the system/website are current and reliable.						
	2. The information provided by the system/website is easy to understand.						
	3. Clear information (such as online help, on-screen messages, and other documentation) are present and provided with the system/website.						
F.	**Security**	5	4	3	2	1	Comments
	1. The system/website security features covers Admin System access, Feature access, Database field access, Master file changes and Standing data.						
	2. The reports produced by the system/website are detailed and protected by access levels.						
	3. Each user have a personal password, users have different permission levels and security management system logs, data and security of the database.						
G.	**Maintainability**	5	4	3	2	1	Comments
	1. The system/website is easy to maintain even without technical support.						
	2. The system/website provides administrative control panel that allows information to be updated real-time in its windows forms, tables or web pages.						
	3. The system/website has a comprehensive & user-friendly that includes help & support and user's guide.						
H.	**Portability**	5	4	3	2	1	Comments
	1. The system/website can be transferred to any workstation and/ or webhost or any platform.						
	2. The system/website is accessible at all types of devices or workstation.						
	3. The system/website can be easily transferred without fear of system failure and/or data loss.
